

As a full-stack engineer, I use my skills to design and develop beautiful and usable apps that solve critical problems. In my prior career in hospitality and as an entrepreneur, I learned to work at a top-level, even under tremendous pressure, and implement ideas focusing on consumer needs.

Gary Bautista

EXPERIENCE

Software Engineer Fellow – Formation, remote

Sep 2021 –present

- Selected for highly competitive Fellowship for personalized coaching from top-tier software engineers.
- Completed intensive training over six months to master Git, React, and theoretical CS topics through independent projects, pair-programming, and small mentor-led groups.
- Implemented production-ready features, including user Feedback, search functionality, and user navigation.

Tech Stack: HTML, CSS, JavaScript, React, Git, Material-UI

Software Engineer Freelancer – Upwork, remote

Aug 2020 – June 2021

- Lead Developer in a nonprofit startup, building an applicant tracking system for admins using JavaScript, HTML, CSS, and Firebase products. This system gave management a better overview of applicants.
- Developed the front-end User Interface of a website using HTML, CSS, JavaScript, and Firebase, to build brand credibility and increase accessibility.

Tech Stack: HTML, CSS, JavaScript, React, Node.js, Firebase

Frontend Engineer (contract) – Seito Sushi, Orlando

April 2021 – June 2021

- Developed a server-less employee tracking app using Firebase products to help managers handle early release requests by streamlining the submission process instead of having a group chat for the requests.
- Implemented authentication using Firebase Authentication to ensure that every cut request comes from a verified user with a total of 23 users registered and active

Tech Stack: HTML, CSS, JavaScript, React, Node.js, Firebase

PROJECTS

[Synesthesia](#) | *Next.js, Chakra UI, Firebase*

2022

GitHub: github.com/Gargar77/Software-Engineer-I

- Developed a simulator that can transform real time webcam video into an audible tone, simulating a neurologic condition called Synesthesia.
- Implemented as a Single page application with Next.js, deployed with Firebase Hosting.

[Galleria art Slideshow](#) | *HTML, CSS, SCSS, JavaScript, React*

2021

GitHub: github.com/Gargar77/galleria

- Developed a React SPA for Art Museums to dynamically showcase artworks in a slideshow format, mirroring the experience of viewing the artwork in person.
- Implemented an animated slideshow mode, in which component mounting and un-mounting are timed with animations to give the illusion that all artworks are rendered on the screen simultaneously, increasing the performance of React's rendering cycles.

[CleanTrac social media](#) | *React, Redux, Rails, PostgreSQL, bcrypt*

2020

GitHub: github.com/Gargar77/CleanTrac

- Developed a social media platform that allows janitorial companies to collaborate with their employees, enhancing their business communications.
- Implemented an API back-end with Ruby on Rails and SQL, which handled authentication and storage, extending the application into native implementations.
